MEET THE FOUNDER

Where it all began ...

I have always been surrounded by fashion, design and style. Growing up with the influence of my father's fashion business, it was a natural progression to forge my own successful career in the fashion and design industry. This is what I love. It is what I am passionate about. And F.Y.G. has simply become the natural extension of my experience of and love for stylish, affordable and sustainable design.

In creating F.Y.G. it was important to produce not just another scented product but an immersive experience. What started as a desire to re-capture my childhood joy of family holidays spent in Greece, then developed into a project of encapsulating a range of significant and beautiful experiences from the past.

'It's not business, its personal'

Whilst each scent has a story and individual character to evoke memory, feeling and mood, it was equally important to create modern designs – to fit in with and subtly enhance any living space. And with all of that, F.Y.G. had to be sustainable.

That is why each product is 100% natural and recyclable.

So, I invite you to take your time, shop around, try out something new, and Find Your Glow.

Demi Pendakis

COLLECTIONS

Seasons

The F.Y.G seasons collection is a new and exciting concept of layered, scented candles, set with 3 wicks in stylish metal containers. Each seasons candle takes you on an extended journey through Spring/Summer or Autumn/Winter, as each individually perfumed layer evolves into the next.

As with all FYG candles, our double-layered seasonal candles are hand-poured, using a blend of coconut and rapeseed wax, pure essential oils and completed with 3 pure cotton wicks, making them 100% natural and vegan friendly.

Our seasonal layered candles also come with an eco-friendly seed paper dust card allowing you to re-use your FYG jar as a plant pot once the candle has burned through. Once your candle has burned, simply place the dust card cover in your FYG jar with soil and water and watch as your flowers grow and blossom.
